

MANAGEMENT, M.S.

Program Overview

The objective of the Master of Science in Management (MSM) is to provide a high quality, general business education to recent college graduates who have earned a bachelor's degree in a field other than business, such as in the arts, humanities, sciences, or engineering, and have had limited exposure to, and experience in, business. The MSM provides students the knowledge and skills to apply key business concepts in organizational settings in the areas of accounting, finance, marketing, operations and decision support systems, information technology, economics, and statistics. The program prepares graduates to build on their undergraduate major to develop marketable knowledge and skills that are valuable to businesses and other organizations seeking management talent.
