Description
The Department of Computer Science provides undergraduate and graduate programs featuring courses and laboratories in data structures and algorithms, computation theory, artificial intelligence and machine learning, computer systems, computer graphics and user experience, programming languages and translation, database systems, human context and ethics, as well as other traditional, modern, and interdisciplinary subject areas.

Mission
Loyola Marymount University’s Department of Computer Science aims to prepare the next generation of academically well-rounded, technically proficient, and socially responsible computing specialists. Through a rigorous, personalized, and interdisciplinary curriculum that integrates theory and practice, graduates are empowered to make an impact in any of computing's industrial, scholarly, and entrepreneurial futures.
