

MATHEMATICS, B.S.

Objectives

This degree program is designed for students who want a broad foundation in mathematics. By choosing appropriate mathematics electives in consultation with their faculty advisor, the student can emphasize in pure mathematics, applied and computational mathematics, or a combination of both. The degree can be tailored to meet the needs of students who expect to pursue a graduate degree in pure mathematics, expect to pursue a graduate degree in applied mathematics, or intend to work in a mathematics-related field in industry.

Learning Outcomes

1. Content Proficiency. In each of the following subject areas of mathematics:
 - a. calculus and analysis,
 - b. abstract and linear algebra,
 - c. probability,
 - d. numerical methods and scientific computation;
 Students will be able to:
 - i. State and use basic definitions and theorems.
 - ii. Solve problems using a variety of techniques including: methods of proof, geometric reasoning, algebraic thinking, algorithmic techniques, and the application of computer software and programming.
 - iii. Explain the central concepts of the subject.
2. Communication. Students will be able to communicate mathematics both orally and in writing. They will do so according to accepted standards in mathematics.
3. Tools. Students will employ a variety of tools such as the library, Internet, computers, and calculators to solve problems and do undergraduate research.
4. Independent Learners. Students will be able to independently investigate a mathematical topic.
5. Career and Professional Preparation. LMU mathematics graduates will be prepared to engage in mathematics-related professions or in a graduate school academic environment. This preparation will include significant pre-professional experiences.

General Major Requirements

Students must complete the corresponding Bachelor of Arts or Bachelor of Science University Core requirements as defined by the Frank R. Seaver College of Science and Engineering; students will choose the proper sequence of University Core courses in consultation with their advisor.

Mathematics majors and minors are not permitted to enroll in a mathematics course without a minimum grade of C (2.0) in that course's prerequisite. A minimum grade of C (2.0) is required in each course in the lower division major requirements. A minimum cumulative grade point average of C (2.0) is required in the upper division major requirements for graduation.

Code	Title	Semester Hours
Lower Division Requirements		
MATH 131	Calculus I	4

MATH 132	Calculus II	4
MATH 181	Introduction to Programming	2
MATH 190	Workshop in Mathematics I	2
MATH 234	Calculus III	4
MATH 246	Differential Equations and Linear Algebra	4
MATH 249	Introduction to Methods of Proof	4
MATH 251	Applied Linear Algebra	4
MATH 290	Workshop in Mathematics II	1
Select two of the following:		6-8
BIOL 101	General Biology I	
BIOL 102	General Biology II	
CHEM 110	General Chemistry I	
CHEM 112	General Chemistry II	
CHEM 114	General Chemistry for Engineers	
CMSI 1010	Computer Programming and Laboratory	
CMSI 2120	Data Structures and Applications	
PHYS 1100	Introduction to Mechanics	
PHYS 2100	Introduction to Electricity and Magnetism	
Subtotal		35-37
Upper Division Requirements		
MATH 323	Real Analysis I	4
MATH 333	Abstract Algebra I	4
MATH 361	Probability and Mathematical Statistics	4
MATH 382	Applied Numerical Methods	4
MATH 390	Workshop in Mathematics III	1
MATH 492	Workshop in Mathematics IV	1
Select one of the following:		4
MATH 423	Real Analysis II	
MATH 433	Abstract Algebra II	
MATH 450	Advanced Linear Algebra	
MATH 460	Advanced Topics in Probability	
MATH 472	Topology	
MATH 482	Advanced Numerical Methods	
MATH 496	Mathematical Modeling	
Select twelve semester hours of upper division MATH electives chosen in consultation with their faculty advisor		12
Subtotal		34
Total Semester Hours		69-71
